

Gediz Delta: explore a mosaic of wetland conditions

A wetland used by flamingos includes more than the place where a flock is visible. Water and salinity create different surroundings within the wider area.

Purpose

Explore the topic by separating observations, sourced information and questions. This activity can be completed at a desk; it does not require intervention in a habitat or heritage site.

You will need: paper, a pencil and the reading source listed on the next page.

Activity steps

1. Draw several water and shore areas in one diagram.
2. Add questions about feeding, breeding and shelter.
3. Record the date of a photograph or count.
4. Keep a short personal observation separate from a site-wide estimate.

Name / group: Date: Source:

For any visit, follow the relevant site guidance. Observe without capturing, moving or feeding wildlife, or touching historic surfaces.

Your learning record

1. My sketch, diagram or direct observation

2. Information I checked in the source

3. My interpretation and unanswered questions

4. My next learning step
